This Company has secured the following tracts of land: Eight acres four thousand feet northwest of the six gushers; 12½ acres ten thousand feet north of the great wells; 200 acres five and one-half miles due south of the wells; 2500 acres oil land in Hardin and Tyler counties. The first three tracts described above are adjoining the property belonging to the Drillers Oil Co. The Drillers Oil Co. have had the most successful sale of stock of any Company in the field and their stock is now selling at from 50 to 100 per cent. profit to the first purchasers. The Company has no more to offer at any price. It was only on the market ten days and will advance to many times the present price as soon as they strike oil. The largest sales of Drillers stock were made to people who were in Beaumont from all parts of the country and investigated the different companies and saw their properties, then purchased Drillers stock. Our three most centrally located properties are immediately adjoining the best properties of the Drillers. With a few strengthening additions the management will be the same. We have no prospectus written in flowery language promising many impossible dividends and figuring out millions to every holder of a dollar's worth of stock, nor have we a map showing our property surrounded by gushers but we try to give the public a true statement of what property we have. We tell them that we believe there is oil under our property and assure every buyer of our stock that we will, to the best of our ability, use the treasury funds of the Company to the very best advantage in developing the properties of the Company and sufficient stock has been set aside to develop every piece of property. No officer receives a cent of salary, and will not, until these properties have been developed. By inquiring you will find that the directory is composed of reputable men, whose judgment you can depend upon. We have arranged with contractor to commence sinking wells as soon as rigs are available.
